

Public Notice

Notice to the public is hereby given that the Southwest Clean Air Agency (SWCAA) has made a preliminary determination to issue Air Discharge Permit number 15-3157R1 to the Cowlitz County Department of Public Works to address an anticipated increase in landfill gas generation and an increase in sulfur dioxide emissions from the landfill gas flares at the Cowlitz County Headquarters Landfill. The increased landfill gas generation is expected to be accompanied by a proportional increase in all associated pollutants except sulfur dioxide and hydrogen sulfide. Minor changes to permit language are also proposed. The affected facility is located at 3434 South Silver Lake Road, Castle Rock, WA.

Copies of the preliminary Air Discharge Permit and associated Technical Support Document are available for review at 11815 NE 99th Street, Suite 1294, Vancouver, Washington, Monday through Friday from 7:00 a.m. to 5:30 p.m. Electronic copies are available for review in the permit section of SWCAA's internet website (<http://www.swcleanair.org/permits/publiccomments.asp>). This material will be made available in other media, if necessary. All written or oral comments must be received by SWCAA within 30 days after this publication. Final action by SWCAA to approve, modify or deny the proposal will be taken within 10 days after the close of the comment period. If there is a demonstrated significant public interest, a public meeting may be held at the close of the public comment period.

Questions and comments should be directed to Clint Lamoreaux at (360) 574-3058 ext. 131, clint@swcleanair.org, or at the address listed above.
