

# What is EPA doing to help reduce air toxics emissions?

Regulatory and Voluntary Projects

# New Regulations

- Boiler MACT, boiler area source, and new incinerator rules
- Engine MACTs and engine area source rules
- Collision Repair area source rule
- Gas Dispensing Facility area source rule
- Chemical manufacturing area source rule

# Risk and Technology Review

- Rules to determine if technology first approved is still adequate and
- Whether all the controls in place to assure less than 100 in a million risk
- Next category to be proposed
  - Pulp and Paper Manufacturing
  - To be proposed by 6/15/2011

# Voluntary Efforts

- Indoor Air
  - Tools for Schools
  - Air Quality Building Education and Assessment Model (I-BEAM) - Guidance tool for building professionals interested in indoor air quality in buildings
  - EPA's school siting draft document - <http://www.epa.gov/iaq/schools/>
- Community Scale Air Toxics Monitoring Grants – requests for proposals out soon
- Diesel Emissions Reduction Act (DERA) grants to s/l/t and communities
