Fire Training Notification #: FTN- _____ - _____

SWCAA Rural Structure Fire Training Notification

This form is for structural fire training outside urban growth areas and outside permanent no burn boundaries. (RCW 52.12.150)

Date Submitted: ____/____/____

Fire Department or Fire District that will be training: _____

Mailing Address:

_____, _____, _____, _____
Street Address City State ZIP Code

Phone: ____-____-____ FAX: ____-____-____

Fire Training Location:

_____, _____, _____, _____
Street Address City State ZIP Code

Quantity and Description of material to be burned: _____

Purpose of exercise: _____

Number of personnel receiving training: _____

Equipment used and covered by exercise: _____

Total hours of training to be administered: _____

Requested date(s) and time(s) for drill(s): _____

Comments: _____

Signature: _____ Print Name: _____

Title: _____

Has the structure been inspected for other types of Hazardous Materials? <input type="checkbox"/> Yes <input type="checkbox"/> NA <small>(For more information contact Rob Rieck at the Washington Department of Ecology: 360-407-6751 or rori461@ecy.wa.gov.)</small>		Date Received:
Has structure been inspected by an AHERA inspector? <input type="checkbox"/> Yes <input type="checkbox"/> NA		
Has Asbestos Notice of Demolition been received? <input type="checkbox"/> Yes <input type="checkbox"/> NA		
For Agency Use Only:		
Approved for demolition or fire training on or after: ____/____/____		
Reviewed by: _____ Title: _____ Date: _____		

RCW 52.12.150 Setting fires for firefighter instruction — When burning permit not required — Notice, inspection required.

Without obtaining a permit issued under *RCW [70.94.6546](#), fire protection district firefighters may set fire to structures located outside of urban growth areas in counties that plan under the requirements of RCW [36.70A.040](#), and outside of any city with a population of ten thousand or more in all other counties, for instruction in methods of firefighting, **if all of the following conditions are met:**

- (1) In consideration of prevailing air patterns, the fire is unlikely to cause air pollution in areas of sensitivity downwind of the proposed fire location;
- (2) The fire is not located in an area that is declared to be in an air pollution episode or any stage of an impaired air quality as defined in RCW [70.94.715](#) and [70.94.473](#);
- (3) Nuisance laws are applicable to the fire, including nuisances related to the unreasonable interference with the enjoyment of life and property and the depositing of particulate matter or ash on other property;
- (4) Notice of the fire is provided to the owners of property adjoining the property on which the fire will occur, to other persons who potentially will be impacted by the fire, and to additional persons in a broader manner as specifically requested by the local air pollution control agency or the department of ecology;
- (5) Each structure that is proposed to be set on fire must be identified specifically as a structure to be set on fire. Each other structure on the same parcel of property that is not proposed to be set on fire must be identified specifically as a structure not to be set on fire; and
- (6) Before setting a structure on fire, a good-faith inspection is conducted by the fire agency or fire protection district conducting the training fire to determine if materials containing asbestos are present, the inspection is documented in writing and forwarded to the appropriate local air authority or the department of ecology if there is no local air authority, and asbestos that is found is removed as required by state and federal laws.

HAZARDOUS WASTE ASSESMENT WAC 173-303: The state’s Dangerous Waste Regulations (WAC 173-303) requires that demolition debris be evaluated to determine if it is dangerous. The evaluation should be completed before demolition to ensure that hazardous constituents are not released to the environment and do not present a risk to human health during or after demolition. These requirements apply to all buildings being demolished and are the responsibility of the property owner. Ecology’s website, <http://www.ecy.wa.gov/programs/hwtr/demodebris/index.html>, provides more information about sampling and testing construction materials to determine if they present a risk. For more information please contact Rob Rieck at the Washington Department of Ecology: 360-407-6751 or rori461@ecy.wa.gov.

Additional Fire Training Burn Notification Conditions:

- **SWCAA must be notified on the day of the training prior to beginning the training burn;**
- **A copy of this notification must be kept available on-site throughout the training burn;**
- **Other notification conditions:**
